

HAK ASHIQ M

Full-Stack | Backend Developer

 thakashiq@gmail.com  +91 8056211285  Chennai, Tamilnadu  [LinkedIn](#)  [GitHub](#)

EDUCATION

B.Tech Information Technology 2023 – 2027 | Coimbatore, Tamilnadu
SRI SHAKTHI INSTITUTE OF ENGINEERING AND TECHNOLOGY
CGPA: 7.12 (up to Semester VI)

DHANISH MATRICULATION HIGHER SECONDARY SCHOOL-HSC 2023 | Chennai, Tamilnadu
79 %

SKILLS

LANGUAGES: Java | C
FRAMEWORKS: Spring Boot | Spring Security | React | FastAPI
DATABASE: MySQL | MongoDB | Redis
TOOLS: Git | GitHub | IntelliJ IDEA | REST APIs | Maven | JWT
SUBJECTS: Object-Oriented Programming | Data Structures and Algorithms
SOFT-SKILLS: Problem Solving | Communication Skills | Logical Thinking | Quick Learner

PROJECTS

InterviewIQ - AI-Assisted Mock Interview Platform | Java • Spring Boot • React • MySQL • Redis • LLM API

- Developed a full-stack AI-Assisted mock interview platform that enables resume analysis, skill assessment, adaptive interviews, and personalized learning recommendations.
- Designed and developed scalable REST APIs using Spring Boot and MySQL, following clean code principles and modular software design.
- Integrated FastAPI and LLM APIs for resume scoring, skill extraction, interview question generation, and answer evaluation while optimizing API performance using Redis caching.

RentTech – Equipment Rental Marketplace | Java • Spring Boot • Spring Security • React • MySQL • JWT

- Built a full-stack peer-to-peer equipment rental platform with a focus on backend reliability and real-world marketplace workflows.
- Implemented secure booking logic with conflict detection and business rule validation to prevent overlapping bookings, ensuring reliable and secure rental transactions.
- Designed and developed RESTful APIs following modular software design and clean code principles, integrated a React frontend, and optimized application performance using Spring Data JPA, database indexing, and efficient search/filtering for faster equipment discovery and booking operations.

Hospital Management System | Java • JDBC • MySQL • OOP • Collections

- Developed a console-based Hospital Management System to manage patient records, appointments, and hospital operations.
- Managed 100+ patient records using JDBC + MySQL with full CRUD operations via foreign key constraints
- Applied OOP principles, clean code practices, modular software design, and Java Collections Framework for efficient in-memory data management.

CERTIFICATES & ACHIEVEMENTS

- Generative AI Leader Certificate - Google Skills
- Selected for Smart India Hackathon (SIH) – Intercollege Round
- Solved 250+ LeetCode problems across Arrays, Linked Lists, Trees, Graphs, Dynamic Programming, and Greedy algorithms.
- Winner, Anna University Inter-Zonal Kho Kho Tournament (2023–2024).
